JEREMY SALT CO.

(INCORPORATED.)

Wholesale Dealers and Manufacturers of

ALL GRADES OF **SALT.**

SALT LAKE CITY, UTAH, Dec. 29, 1890.

Jeremy Salt Co.:

The specimen of COARSE SALT received Dec. 17, 1890, from your office has been submitted to a careful examination and analysis, as per request, with the following results.

The sample contained:

	PER CENT.
Sodium Chloride	98.101
Calcium Chloride	0.322
Calcium Sulphate	0.364
Magnesium Sulphate	0.021
Insoluble Matters	0.214
Moisture	0.352
Loss during analysis	0.026
	100.000

This salt is of exceptional purity. According to published figures, Commercial Bay Salt from other sources seldom exceeds 96 per cent. purity. Respectfully,

J. E. TALMAGE, D. S. D., Ph. D.

NEATLY FURNISHED. WELL VENTILATED.

SELECT ❋ FURNISHED ❋ ROOMS,

Single or En-Suite. Convenient to Business.

STEAM HEAT AND ELECTRIC LIGHTS.

TERMS MODERATE. Clayton's Block, 214½ S. State St.

COMFORTABLE. MRS. H. S. HOWLIN, Proprietress. NEW and CLEAN.

AUTHORIZED COPYRIGHT EDITION.

NADA THE LILY.

By H. RIDER HAGGARD, Author of "She," "Allan Quatermain," etc. With 23 full-page illustrations. By C. H. M. Kerr. 12mo. cloth, ornamental, $1.00.

A thrilling book full . . . of almost incredible instances of personal daring, and of wonderful revenge . . . The many vigorous illustrations add much to the interest of a book that may safely be denominated as Mr. Haggard's most successful venture in the writing of fiction.—*Boston Beacon.*

MANUFACTURERS OF

FINE CREAMERY BUTTER.

CLEANLINESS is our motto, beginning with handling the cows in the barn to making the milk into butter.

It is made by L. ED. BENEDICT, late butter maker at Vice-Pres. Levi P. Morton's celebrated "Ellerslie Dairy," N. Y., and winner of first prize and gold medal at the great Columbian Food Exposition, Madison Square Garden, N. Y. City, October 1-27, '92.

Send Orders for MILK, CREAM or BUTTER to ... 406 DOOLY BLOCK.

INTRODUCTORY.

SALT LAKE CITY, capital of Utah Territory, is the most important city in the great basin bounded by the Rocky Mountains on the east and the Sierras Nevada on the west. As the centre and distributing point of a vast area of country, it is rivalled only by Denver, while its opportunities are vastly greater than those of the Colorado metropolis. Its history, so closely interwoven with the progress and government of the Latter-day Saints, gives it a religious prominence akin to that of Rome and Mecca in Europe and the Orient; while its natural surroundings vividly recall the scenes of Holy Land. There is no city like Salt Lake in the Western Hemisphere.

Bounded on the east and north by the Wasatch range, whose lofty peaks are covered with snow nearly the entire year, Salt Lake City crosses the Jordan, and is gradually extending its suburbs to the foothills of the Oquirrh range on the west and platting additions on the plain to the south. Its altitude is 4,300 feet above sea level. The old city is laid out in the form of a parallelogram, the streets crossing each other at right angles, and every block is of uniform area. The exceptions are noted only in the business district, and the innovation is of recent undertaking, made necessary by the demands which increased trade presented for more streets closer together. The streets are lined with stately poplars, and along the gutters flows living water from the mountains, clear enough at most times to invite the pedestrian to stoop and drink.

POPULATION.

The national census of 1890 gave to Salt Lake City a population of 46,000 souls. A census of the city made the following year increased this aggregate to 57,000. This Gazetteer contains the names and residences of 25,404 adults. Deducting 2,000 names for those duplicated in firms and changes in appendix leaves 23,404. Applying the rule which experience has proved to bring the populations of cities to a close estimate, namely, by multiplying the total number of adults by $3\frac{1}{8}$ ($\frac{1}{4}$ less than usual), the product is found to be 73,138.

FINANCIAL CONDITION.

A business condition which people outside of this city and Territory would list in the catalogue of virtues, and one which commands their astonishment as well as admiration, is fulfilled in the punctuality and rectitude of Salt Lake's merchants and business men. As a rule its people are always found ready to pay their debts. Assignments for the benefit of creditors are of rare occurrence. Although the universal depression in business affects this city and Territory in nearly the same proportion as the other silver States of the Union, business men and owners of realty are not found absolutely "hard up." Taxes and assessments are promptly paid. The delinquent list will not embrace as many pieces of property as are enumerated in the lists of unpaid taxes of cities of 25,000 population in the States. According to the City Assessor and Collector, fully 92 per cent. of the taxes spread for municipal and school purposes during the coming year of '93 were collected on Dec. 1 of the present year, with one month yet to run before delinquent property is offered for sale.

The assessed valuation of property in Salt Lake from which taxes were collected during the year amounted in the aggregate to $51,000,000, of which $39,000,000 is set down as real and $12,000,000 as personal property. The rate of taxation is 5 mills for municipal and 2 mills for school expenditure.

The plan of assessment has been to rate real property at 70 per cent. of a true valuation. Adding 30 per cent. to the real property assessed would bring the true valuation to $68,000,000, which, together with the assessed value of personal property, would run up a total of $80,000,000.

The city is bonded in the sum of $1,500,000, paying interest at 5 per cent. A loan for school purposes was negotiated recently in the sum of $150,000, upon which bonds were issued bearing the same rate of interest. Salt Lake

City bonds have always found competition among New York brokers, and are regarded as gilt-edge securities in the money market. Among a list of at least a dozen cities located west of the Missouri (including Denver and Kansas City), presented to the City Council by the last Assessor and Collector of Salt Lake, only one city in the list—Portland, Or.,—received more advantageous terms in Wall Street than the metropolis of Utah.

A list of banks, national, individual and banking corporations will be found in the business directory of this volume. While it shows no increase in number over that of last year, general trade depression has yet failed to summon any to surrender. None have gone out of business. On the contrary, the Deseret National has increased its capital stock from $500,000 to $1,000,000, thereby increasing the total amount of capital invested in banks and banking institutions to $6,700,000

BUILDING.

For the eleven months of the present year the Building Inspector has issued 578 building permits, 23 of which are classified as business blocks, exclusive of public buildings which are in process of erection or were completed this year under permits issued in 1891. The cost of these business blocks is given at $188,240; the cost of dwellings erected and in process of erection (555) is set down at $976,628, making the total cost of eleven months' building, $1,164,868. The Inspector is confident that his report to the Council, which will include the month of December, will increase the valuation given to $1,500,000.

The erection of the new City and County Building began in earnest early in the season, and at this writing three stories reveal their elegant proportions above the foundation and basement. Next to the great Mormon temple it will be the chief architectural gem of the mountains, and will suggest the style of architecture of the future capitol of the State of Utah. It has just been decided to enlarge the plans so as to make it fireproof throughout.

The total value of buildings for which permits were issued in 1891 is reported at $2,231,958. When we reflect that this gross amount included such magnificent structures as the Dooly and McCornick blocks, one should be satisfied with the proof which this year's partial report gives of the abiding faith of Salt Lake's people in its future greatness. With the exceptions mentioned, this year's building operations will favorably compare with those of 1891.

PUBLIC IMPROVEMENTS.

Salt Lake City is justly proud of its water supply, both as to quantity and quality. Within the past year the waters of Parley's Creek have been brought to the city by means of a masonry conduit, and added to the volume given by City Creek and that proceeding from Emigration canyon. A water famine is now an impossibility, as an abundance is assured for a population twice as large as Salt Lake, even for the most lavish purposes of irrigation. Water mains and pipes have been extended even to the sparsely settled districts, and the work performed is of an enduring character.

The expenditures of the Water Department for the ten months ending October 31st of this year have been $225,000.

Street paving is a matter which has commanded earnest attention during the past year, with a view of securing that which will prove most durable and permanent. The consensus of public opinion leads in the direction of home material, and already home contractors are at work on Main, First and Second South streets, preparatory to laying down a pavement of Utah asphaltum. Cement sidewalks will line the streets thus paved. The estimated cost of this work is $140,000. The pavement of State street, from South Temple to Fourth South, was completed this year at a cost of $70,000.

All departments of the municipal government are being enlarged to meet the demands of a growing metropolis. An estimate of the appropriations absorbed in carrying out the work of the departments named for the past ten months is furnished by the City Auditor:

Fire	$40,000	City and County Building	$70,000
Police	45,000	Sidewalks	15,000
Health	22,000	Street Lighting	27,000
Street	75,000	Sprinkling	17,000
Sewerage	20,000	Cemetery	15,000

A new city jail and additional fire stations will be erected during 1893.

MANUFACTURES.

From a report made to the Chamber of Commerce, some time ago, the remarkable fact was revealed that Salt Lake City employs more labor, operates more capital and produces greater results in manufacturing than the States of Wyoming, Montana, Idaho and the Territory of Arizona combined. There are in successful operation in this city, boot and shoe, knitting and over-all factories, woolen and paper mills, tanneries, confectioneries, fence and mattress factories, cracker factories, show-case makers, brick makers, aerated water works, roller grist mills, cigar factories, vinegar factories, soap making, salt refining, chemical works, glass works, wood working, printing, book binding, brewing, pickle and canning factories, cement works, etc. But perhaps the greatest addition to Salt Lake City's industries is the great stockyards and packing house.

When our people cease to place so much dependence on the product of the silver mines, and turn their attention towards absorbing the wealth of other people by producing finished articles from the raw material above and below the earth around them, Salt Lake City will take rank as the Pittsburg of the Rocky Mountains.

The discovery of natural gas within easy distance of the city will also give an impetus to manufacture. Already preparations are being made to convey it in pipes to the city and place it in the hands of the man in the foundry and the woman in the house.

MINING.

Salt Lake City is the headquarters of assayers and capitalists who handle the products of the mines, and from whence the ore and bullion is shipped. The total product of Utah mines for 1891 was valued at $12,000,000. The mining industry is concisely reviewed in pages 5, 6 and 9 of the Territorial Department.

RAILROADS.

Although what might not be properly termed a railroad centre, its position and importance justify the claim that the Pacific railroads of the future will either seek this city as a terminal point or stretch their feeders into the capital of Utah. Projects are talked of and even companies are incorporated looking to this end, one of them being the San Francisco, Los Angeles & Salt Lake Railroad. The Great Salt Lake and Hot Springs Railroad is more ambitious than its local title would imply, and will push its track into the Deep Creek mining district, and probably further. At this writing, what is designated as "Col. Murray's road" bids fair to develop something more than a paper road, and narrow-guage roads to the coal fields are strongly urged as the best means to inflict blows on the monopoly which reaps 100 per cent. on the supply brought to Salt Lake City. Such a road, if built, will be a feeder to the Utah Central.

The two great trunk lines which enter Salt Lake are the Union Pacific and the Rio Grande Western.

The following table gives one a clear idea of the traffic of these roads with the business of Salt Lake City. The tables are prepared from the beginning of the year, with estimates from December 15:

Rio Grande Western.

No. cars received at Salt Lake City, machinery, implements and merchandise	4,087	
" " " " coal	2,402	6,489

Union Pacific.

No. cars received at Salt Lake City, machinery, implements and merchandise	6,166	
" " " " coal	4,310	10,476
Total		16,965

The Coal Traffic.

No. cars Colorado hard coal brought to Salt Lake	1,338
" shipped by U. P. Coal Company's Scofield mines	2,559
" coal and slack shipped from Rio Grande Western mines	3,357
" coal from Castle Gate mines	5,647
" coke " "	515
Tonnage of coal, slack and coke shipped by P. O. Coal Company from all its mines, tons	223,333

EDUCATION.

All classes of citizens are fully alive to the importance of public education. In fact it is the best promoter of changing conditions in Utah, and the effort to eliminate it from politics has met with signal success. The methods of instruction are the same as those which receive the approval of the best teachers in the Eastern states. The buildings that have already been erected will favorably compare with those of metropolitan cities elsewhere.

Eight new school buildings were commenced in the summer, some of them already finished and occupied, and a ninth will be erected early in the season of 1893. The cost of these buildings, together with the sites, will not fall short of $500,000. The city now contains 29 public schools, with 138 teachers. For the month of November the average attendance was 6,686 pupils, which is considered by the Superintendent as a fair average the year round. In enumerating the number of schools, only such buildings where instruction is directed by a Principal in person are listed. Until the new schools are ready for occupancy, it has been found necessary to rent school room in convenient places in the districts.

Denominational schools, necessities of past conditions, still exist, but their usefulness is directed now in the line of normal training. The Catholics have an academy and college which receive pupils from the surrounding States and Territories; the Episcopalians, Presbyterians and Congregationalists also have academies and schools where particular attention is paid to the higher branches of education, and so have the Methodists and other leading denominations in the city. Salt Lake City is also the seat of the University of Utah. There is also a school of short-hand, a commercial college, and other private institutions of special branches of education.

AS A PLEASURE RESORT.

So much has been written about Salt Lake City in this respect, that expressions which have found voice elsewhere is the only testimony needed to support the claim that this city is without a peer on the continent. With its advantages of climate, one may absorb invigoration in even the most arduous labor, while at a trifling expense he can enjoy the delights which close Saratoga and Newport to all but millionaires. Medicinal springs abound within the corporate limits of Salt Lake City, and an analysis of their curative properties places them on a plane with the famous Hot Springs of Arkansas. The Great Salt Lake will be in the near future, as it certainly deserves to be, the resort of wealthy pilgrims from all over the country. During the season of 1893 transportation facilities will be greatly enlarged, and public and private enterprise will strongly compete in endeavors to secure the largest share of patronage to the various delightful resorts on its shores.

Liberty Park, in the southeastern part of the city, is on the line of electric car travel. Calder's Park, Wagener's Grove and Smoot's Park are fully equipped for all the pleasures sought by picnic parties. The beauties of the City Creek canyon have been imparted to canvas. An hour's drive from any part of Salt Lake towards the canyons of the Wasatch reveals scenery that only the Alps can match. Fort Douglas looks down on the city from the northeast, and is a popular place of visit, especially on Sundays.

In one word, Salt Lake City stands unrivalled in its presentation of opportunities to the man of business and contentment to the man of leisure. It has its theatre and varieties, its clubs and its libraries, its social and benevolent societies. There is only one feature of Eastern civilization lacking—the Eastern mendicant. Absolute poverty is comparatively unknown.

THE GAZETTEER.

The compilers of this Gazetteer are proud of their work. The labor it entailed was directed with a view of making it complete in every particular; and in this spirit the canvass proceeded zealously, systematically and conscientiously. Every feature received careful personal attention. No reliance was placed on information received second-hand, nor on back number editions of "boom" publications and pamphlets. This was the promise we gave our patrons at the start. We now retrieve that promise in our guarantee that the name of every adult in Salt Lake who has an abiding place will be found in this volume.

PLEASE READ!

THE

Deseret Evening News,

$10.00 PER YEAR, POSTPAID.

IT IS DESIGNED to make this the VERY BEST daily newspaper in the Territory. Every topic of interest will receive prompt, careful, impartial treatment. Events of public interest from every part of Utah will be energetically sought, and the telegraph will be brought into requisition to supply the news from all parts of the world. We are determined to lead in the matter of news-gathering, at the same time avoiding whatever would be discreditable or out of place in a respectable paper. Fearlessly to defend the truth, vigorously to oppose wrong-doing, and earnestly to sustain everything that will benefit mankind and advance the interests of the Church of Jesus Christ of Latter-day Saints—these will be the aims of the DESERET EVENING NEWS.

The Deseret Semi-Weekly News,

$3.00 PER YEAR, POSTPAID.

Will contain the essence of all news and editorial matter appearing in the daily, in addition to other items of instruction designed especially for the homes the Semi-Weekly will reach. Already the best family newspaper in the West, we hope to make it still better, and more deserving of your patronage.

THE DESERET WEEKLY,

$2.50 Per Year, Postpaid.

Will be conducted in the future with a view to supplying every subscriber with the general news in a condensed form, as well as with other matters of interest. It will also enter and endeavor to fill a special field of journalism—keeping a record of the work being done in various parts of the world by the missionaries of our Church, and in dealing more particularly with religious and doctrinal subjects. Letters from the Elders will be presented, individual experiences narrated, verbal reports preserved, statements from the lands where the Gospel has been, is, and can be introduced, and the results to be accomplished. The sermons of the Authorities and the instructions they desire to impart to the Church through the press will, of course, continue to be published. With these objects attained, the Weekly ought to become a paper which no Latter-day Saint can afford to do without.

FOR THESE REASONS.

And others that need not be mentioned, we desire you to become a subscriber to one or more of these papers. They will continue to be, as heretofore, the ORGANS OF THE CHURCH, having the approval of, and, where necessary, being under the supervision of the Presiding Authorities.

Address all communications to the

Deseret News Publishing Co.,

P. O. Box C. Salt Lake City, Utah.

"Altogether a most charming book."—*Chicago Times.*

ON THE PLANTATION.

By JOEL CHANDLER HARRIS, author of "Uncle Remus." With 23 Illustrations by E. W. Kemble, and Portrait of the Author. 12mo. Cloth, $1.50.

The most personal and in some respects the most important work which Mr. Harris has published since "Uncle Remus." Many will read between the lines and see the autobiography of the author. In addition to the stirring incidents which appear in the story, the author presents a graphic picture of certain phases of Southern life which have not appeared in his books before. There are also new examples of the folk-lore of the negroes, which became classic when presented to the public in the pages of "Uncle Remus."

"The book is in the characteristic vein which has made the author so famous and popular as an interpreter of plantation character."—*Rochester Union and Advertiser.*

"Those who never tire of Uncle Remus and his stories—with whom we would be accounted—will delight in Joe Maxwell and his exploits."—*London Saturday Review.*

"The story is well told throughout, and is certain to rank among Mr. Harris's best works. To say the least, it is the most interesting literature of the kind recently published."—*Richmond* (Va), *Times.*

"A charming little book, tastefully gotten up.....Its simplicity, humor and individuality would be very welcome to anyone who was weary of the pretentiousness and the dull obviousness of the average three volume novel."—*London Chronicle.*

For sale by all booksellers; or will be sent by mail on receipt of price by the publishers,

D. APPLETON & CO., 1, 3 & 5 Bond Street, New York.

W. S. McCORNICK, T. G. WEBBER,
W. E. SMEDLEY, CHAS. S. BURTON,
N. W. CLAYTON, LOUIS COHN.

DEPARTMENTS.

The Departments which are represented are:

Piano, Violin, Voice Culture, Organ, Guitar, Mandolin, Delsarte, Elocution, Spanish, French, Italian, German.

FACULTY.

Its membership embraces the foremost artists and teachers of the west, and it may be affirmed that no Conservatory west of Chicago can lay claim to so admirably efficient a corps of teachers.

H. S. KROUSE, Director—Concert Pianist, Teacher of Piano, Harmony, Theory, and Conductor.

WILLARD E. WEIHE, Director—Concert Soloist, Teacher of Violin, Orchestral and String Quartette Classes.

KARL HILL, A. B., B. M.—Teacher of Piano and Voice Culture.

MAGNUS OLSON—Teacher Guitar, Mandolin and Violin.

B. F. HODSON and ALICE McINTYRE—Teachers of Intermediate Piano.

MISS MINNIE HOLT and MISS FRANCILLA ADAMS—Teachers of Primary Piano.

MISS M. L. POWELL—Teacher of Elocution and Delsarte Physical Culture.

CHAS. VENEZIANI, A. M., Ph. D—Italian, Spanish, French and German.

CURICULUM.

The course of study is divided into Primary, Intermediate, Collegiate and Normal. It requires from three to six years to graduate. Each department is so arranged that a pupil may begin from the foundation in the proper methods, and completing any course of study here, may enter the conservatories of Europe without undoing anything that has been done. It is a common thing for pupils seeking admission into the great conservatories in Europe to have to undo a great amount of their former work, on account of its being faulty; this will be obviated in all branches, and especially so in the violin of Prof. Weihe. Prof. Weihe having studied under the best masters of Europe, has the most approved methods of bowing, and thereby is able to take pupils from the first principles through the highest style of artistic playing.

NOT PAINLESS DENTIST,

ooo BUT ooo

Painless Dentistry

An advance of Fifty Years at one Stride in Modern Dentistry!

Dr. Griswold Fills Teeth Without Pain.

All the world dreads the dentist! The celebrated Dr. Hale, after years devoted to experiment and investigation in the effort to devise a method for painless filling, has succeeded in discovering an agent which enables us to prepare and fill the most sensitive teeth without pain.

DR. GRISWOLD has secured the exclusive right to use the "Hale method for painless filling" in Salt Lake City, and is Dr. Hale's General Western Agent.

To my patients my name is sufficient guarantee for the excellence of this method—others are asked to investigate.

This Institution was opened as a **Boarding and Day College,** September, 1886. The fact that in the short space of two sessions its roll number steadily increased from FORTY to nearly TWO HUNDRED STUDENTS is the best proof of its popularity as a seat of learning. The course of studies includes all grades from minims to graduates. The ENGLISH COURSE comprises a thorough ENGLISH EDUCATION—HIGHER MATHEMATICS, CHEMISTRY, NATURAL PHILOSOPHY, GEOLOGY and ASTRONOMY. ANCIENT AND MODERN LANGUAGES—GREEK, LATIN, GERMAN, FRENCH and SPANISH—are taught without extra charge. THE BUSINESS COURSE comprises SINGLE AND DOUBLE ENTRY, BOOK-KEEPING, BANKING, COMMERCIAL CORRESPONDENCE and INVOICING, carried on through the entire course. Young gentlemen who complete this course may enter with confidence of success Counting Houses, Banks, Insurance or Newspaper offices. The College being responsible for the proficiency of all who carry the certificate of this department. *Painting*, *Drawing*, *Vocal and Instrumental Music* taught by highest talent. Telegraphy is a special study and forms an extra charge. Experimental Chemistry is followed by students of the higher course. Nothing has been omitted in the appointment of the Institution that can tend to promote the health and comforts of students. Discipline is firm, while tempered with mildness. Students are required to attend military drills. Students may enter at any time.

WE Particularly request people who are afraid they cannot get as good Trunks here as in the East to call and we will convince them that we are doing just as fine work as any Eastern house, and our prices are the lowest in the city. If you do not have time to call, and want your trunk fixed, drop us a postal card and we will send for it and return when wanted.

We also carry a full line of Leather Goods, such as Travelers' Toilet Cases, Collar & Cuff Boxes, Bill Books, Card Cases, Purses, Ladies' Hand Bags, Silk Hat Boxes.

DON'T

YOU think it is about time that a city of this size had a first-class Trunk Factory? Where everything is warranted as represented; where you can have your trunk or valise repaired at a reasonable price and done when promised? If your old trunk don't suit you, exchange it on a new one. **COME** and see us. We can show you the largest stock of Trunks and Traveling Bags in the city, and everything for the traveling public at

DO IT

Theatrical People, Jobbers and all who have been sending east for trunks don't any more. We make them any size, style or quality, and *make them to suit you.* We are continually adding the latest improved trimmings for our goods, and all the latest novelties in Traveling Bags and Leather Goods. Have you seen the mysterious purse you can't open unless you know how? We have the Paragon Folding Purse; no frame to break; most roomy and least bulky purse made.

J. I. GALLACHER'S,

TRUNK MANUFACTURER,

Salt Lake Employment Office,

ESTABLISHED 1882.

Ladies and others needing help can do well by calling at, or by notifying this office by letter. Fee $1.00 in advance.
Good help furnished.
One week's notice required for country orders.
Girls and others looking for situations in gentlemen's families, hotels, and elsewhere, will do well by calling at the office and leaving their address.
The office is centrally located, five doors east of the Continental Hotel.

Salt Lake Litho. Co.,

SUCCESSORS TO AND CONSOLIDATED WITH

KELLY & COMPANY

(INCORPORATED)

Having recently enlarged our premises and facilities added an extensive Lithographic Plant, and engaged an efficient corps of Designers, Engravers, Transferers and Pressmen, we take pleasure in announcing that we are fully prepared to do all classes of work in this line. Having been established over seventeen years, and gained the full confidence of the best houses throughout the west we can assure our patrons, that all work entrusted to us will be executed with promptness in the best manner and at reasonable figures. Our long experience has convinced us that the employment of the very best talent is the only guaranty of satisfactory work. We have therefore secured expert Artists for all our Departments. Our Designing, Engraving, and Power Press Printing, are all done on the premises. We can truthfully assert, that our establishment is now the largest and most complete in the West, where first class work only is done, and we hope to have the pleasure of securing your patronage. Correspondence solicited and estimates cheerfully furnished. If at any time you need anything in our lines, please communicate with us, and we will foiward Sketch and Estimate at once.

Respectfully Yours,

Kelly & Co.

THE QUALITY of the gas is of the very best, both for heating and illuminating, and for the amount of development, in the opinion of gas experts, the Company's Gas Field and Wells show equally well, if not better, than in any other field yet known.

Gas is found at a depth of some 800 feet, and the yield of some of the wells, on an average, is nearly 5,000,000 cubic feet in twenty-four hours.

RESOURCES OF UTAH.

AGRICULTURAL.

IRRIGATION.

THAT this method is an advantage rather than a detriment to farming, is susceptible of easy proof. The water collects from all directions and, coursing down the mountain sides, carries with it the fine, rich and unimpoverished particles of soil, which, by means of irrigation, are deposited on the cultivated land. Thus the land is being constantly renewed. For the quantity and quality of cereals and for the continuous period the land will yield, the like is unknown in other countries where agriculture depends upon rains. During certain months in the year the water supply for irrigating purposes is inadequate to the demand. To this, more than to any other cause, is due the idea entertained by some that Utah has reached her agricultural capacity. This belief is not the product of reason A sane person, who knows anything about the Territory, knows also that enough water runs to waste in Utah during the winter and early spring months, to irrigate twice the amount of arable land in this Territory the year round.

Artesian wells have proved a great success in many parts of the Territory, notably in Tooele County, demonstrating the practicability and the utility of this method of irrigation. The confidence had in the water capacity of Utah, if successful saving and developing methods are introduced, amounts to a conviction. Statistics of the near future will show an increase in the acreage of land farmed, in the number of persons employed, and in the production, so disproportionate to years past, as to render earlier efforts—not considering the adverse conditions which can never be experienced again, and which were then and have been powerful opposing agencies to material development—seemingly insignificant. However, with the same acreage, the same irrigation facilities, Utah is still capable of supporting a population three, and even four, times that of Utah to-day.

CEREALS.

With the exception of Indian Corn (which does not thrive so well because of cool nights) all the products of the same latitude as Utah thrive remarkably well. The soil and the climate are peculiarly adapted to the raising of wheat and kindred cereals, and to the growth of all kinds of fruit. In Southern Utah semi-tropical fruits and vegetation are cultivated with marked success.

FRUITS AND FLOWERS.

The Basin of the Great Salt Lake is pre-eminently a fruit raising section. All the fruits of the temperate clime grow in this region to unusual size, while the flavor is unsurpassed. It has become an industry and is the source of much wealth in an unostentatious way. Utah fruit, dried, is a luxury elsewhere, and thousands of pounds are shipped away annually. The care of fruit, as a rule, falls to the lot of women and children, the work not being heavy, nor the orchards very large, though they are great in number. The result is that dried fruit constitutes an unrecognized source of wealth which annually brings thousands of dollars into the Territory, and by which the thrifty housewife is enabled to add many comforts to her home, without

which she would otherwise be obliged to content herself. Southern Utah, below the rim of the basin, is peculiarly adapted to vineyards, and to the manufacture of wine. Shrubbery, flowers and shade trees abound and are growing in numbers and in excellence yearly. There is no estimate of the value of the latter, but when a sale or purchase of land is meditated the number and the kind of flowers, lawns and shade trees make a vast difference in the commercial values of a place. Millions of dollars, unaccounted for in the material value of the Territory, exist, observed only as they please the eye and gratify the taste of the beholder.

STOCK-RAISING.

Next to mining, stock has brought more interchangeable wealth or money into the Territory than any other resource. The pasturage for cattle is yearly decreasing, two causes being at work to produce such a result; first, land once common for grazing is now being taken up and used for agricultural purposes, pure and simple; second, and by far the more powerful reason, is the wonderful increase in sheep. Sheep, at present, are much cheaper to keep and give far greater returns, by reason of their rapid increase and because of the wool clip which grows in proportion with the numerical strength of the animals. The vast sheep herds and the immense wool clips, as compared with former years, mark a clear gain.

The people are inbreeding a higher strain into their cattle, and the desire to introduce finer blood into horses has grown with astonishing rapidity and is bearing the most pleasing fruits. There is foundation for the assertion that Utah is singularly a country qualified to produce a fine and healthy race of horses. The reason is to be found in the altitude, with our fine and bracing air, which is pre-eminently calculated to produce a healthy and large-lunged horse. The excellent range is an additional reason. The bunch grass growing along the low foot hills and high in the canyon ravines is admitted to be as nutritious as any grass known. It produces large limbs and superior muscle. These two elements, producing large lungs, powerful limbs and strong and elastic muscles, are winning for Utah an enviable reputation as a horse-breeding section. Horses, as well as sheep, are a rapidly increasing source of wealth in the Territory; and the desire for a better and still better strain of blood is so general as to justify the belief that Utah will soon boast as fine a quality of horse flesh in general, and in particular, as the most favored section of the United States.

One thing that has contributed largely to the success of stock-raising in Utah, by making feed cheap and abundant, was the introduction of alfalfa, or lucerne. Thousands and thousands of acres of land, worthless for meadow, are seeded down with lucerne. The yield is astonishingly prolific, ranging from three to four tons on inferior land and with poor water facilities, to ten tons per annum under more favorable conditions. It is an excellent food for cattle, largely increases the flow of milk in cows, and is a substantial and fattening feed for work horses. It is the best friend to the stock and dairy industries of Utah yet discovered.

TIMBER.

Utah holds an intermediate position with respect to its supply of timber, between the Pacific and Prairie States. Its arable lands are not interspersed with forests, nor yet is it without an adequate supply of timber within its own limits for building, fencing, mining and fuel. The valleys or plains are destitute of forest growth, and in early times willow brush was resorted to for fencing, adobe bricks for building and sage brush for fuel. But the mountains are generally more or less wooded, almost wholly with evergreens, however. The best trees furnish lumber, not technically clear, but the knots are held so fast that they are no real detriment, and the lumber is practically clear. The red pine and black balsam, indigenous to the mountains, make a fence post or railroad tie that will last ten years. The white pine is not so good. More than half of the forest growth of the Wasatch is of the white or inferior variety. On the Oquirrh the trees are chiefly red pine. Scrub cedar and pinion pine are quite common in the south and west. They are of little value for anything but posts, ties and fuel.

Cheapest Good Seeds Obtainable Anywhere.

Other Seeds of Other Growers Promptly Supplied.

MADE IN UTAH BY UTAH PEOPLE. QUALITY HIGHEST AND PRICES LOWEST.

FORMULA BAKING POWDER.

THE MOST WHOLESOME—Because, it leaves a less harmful residue than any other powder; because it does not toughen or decompose the flour in which it is used; because, it is a **Pure Cream of Tartar Powder**, containing neither Lime, Vitriol, Alum nor Ammonia, nor any other substance to ruin the stomach and spoil the skin.

THE STRONGEST — because, every 18 ounces of the powder contains 6 ounces of soda and an equivalent of cream tartar; because, 3 or 4 ounces of soda indicates the strength of the ordinary baking powder; hence, because, the available leavening of Formula, in both quick and slow ovens, is twice that of most other powders.

THE CHEAPEST—Because, its uniform qualities make success easy, and experiments, mistakes and waste unnecessary: because, 12 ounces of any other reputable powder costs as much as 18 ounces of the Formula; because, this added to the difference in strength makes the Formula nearly one-half the cheaper powder.

THE MOST SATISFACTORY—Because, it is chemically perfect, and the flour foods prepared with it are perfect in texture, delicacy and digestibility; because, in all the boasts about "purity" it is the only baking powder with its composition made public; because it is the only baking powder sold under the absolute guarantee that, **if not the BEST baking powder in EVERY respect you return the can and get your money.**

MINES AND MINING.

NO OTHER Territory or State has made such rapid strides in developing its mining interests during the past few years as Utah. Its standing has advanced from ninth to fourth in rank. The mineral output of the Territory now exceeds $15,000,000 annually, and is rapidly increasing, and we predict, that within three years we will stand alone, having outstripped all other States in the race for output of mineral wealth. Some of the greatest mines in the United States are located in Utah. Notably the Ontario, which has paid $75,000 per month in dividends for fifteen years. Accompanying it and operated by the same company is the Daly mine, which has for nine years paid in dividends $37,300 per month. The Emma mine has produced over $6,500,000. The Bullion-Beck is paying $50,000 per month in dividends. The Mammoth $40,000 per month. The Centennial-Eureka $30,000 per month. The Eureka Hill has paid over one million dollars in dividends. Among other notable mines which are heavy and profitable producers are the Anchor, the Woodside, the Old Telegraph, the South Galena, and a score of others.

The discoveries being made in the mining districts of Utah would set any other community ablaze with excitement, and the wonderful riches being unearthed here would be heralded around the world as the most wonderful discoveries of the age. Not only are new discoveries, which contain wonderful deposits of ore, frequently attracting attention, but new mines in old districts are being opened up and developing into unexpected producers. Old mines even are striking large and rich ore bodies which were unexpected. There are a score of mines in Utah which are paying dividends that amount to all the way from ten to thirty per cent. per annum on the selling price of the stock, and there is no more promising investment than stock in some of Utah's producing mines, or a little money put into the development of some of the newly developed properties which have every indication of becoming equally as good as are the present dividend-paying mines in their immediate neighborhoods.

The following is a list, as near as we could gather, of the counties in the Territory in which the different minerals are found:

Alum—Utah and Salt Lake counties.
Aluminum—Utah, Davis and Morgan Counties.
Antimony—Box Elder, Piute and Garfield counties.
Agate—Emery county.
Arsenic—Iron and Washington counties.
Albertite—Uintah county.
Baryta—various.
Bismuth—Juab, Sanpete and Morgan counties.
Cadmium—Morgan county.
Copper—Juab, Millard and Salt Lake counties.
Copperas—Utah county.
Coal—Summit, Utah, Sanpete, Emery and Iron counties.
Carbonate of Soda—Utah county.
Chalcedony—various.
Chrysolite—various.
Cinnabar, quicksilver ore—Sanpete county.
Embolite, chlor-bromide silver—Washington, Morgan and Tooele counties.
Fuller's earth—various.
Garnet—Tooele county.
Geyserite—various.
Gold—Salt Lake, Tooele and other counties.
Granite—Salt Lake county, etc.
Graphite, or plumbago—Utah county.
Gypsum—Washington, Juab and Sanpete counties.
Hornblende—various.

Iron, magnetic and hematite—Davis. Morgan, Juab, Cache and Iron counties.
Jasper—various.
Jet—Sanpete and Emery counties.
Kaolinite, or China clay—Utah, Salt Lake, Davis and Tooele counties.
Manganese—Utah and Tooele counties.
Malachite—Juab, Beaver and other counties.
Marble in varieties—various.
Mica—Davis, Salt Lake and Garfield counties.
Nitre—various.
Oolite—Sanpete county.
Opal in varieties—various.
Ozokerite, or mineral wax—Utah, Wasatch and Emery counties.
Rock Salt—Sanpete, Sevier and other counties.
Saltpetre—Utah county.
Silver—almost all counties.
Sulphur—Millard, Beaver and Utah counties.
Topaz, white, yellow, blue—Tooele, Box Elder and many other counties.
Tourmaline—various.
Talc—Utah, Emery and Piute counties.
Zinc-blende and sulphade—various.

SAMPLING AND SMELTING.

There are thirteen sampling mills in Utah—one at the Horn Silver mine, one at Milford, one at Tintic, five at Sandy and vicinity, three at Park City, and one in Salt Lake. Together they sampled in 1890 about 150,000 tons of ore. Ordinarily, only the fifth or tenth sack of a lot of ore is sampled, and the cost is $1 per ton for the whole of it. Where the whole is sampled, the charge is $4 per ton. The sampler crushes the ore to the size of peas, thoroughly mixes, and sends sealed packages to the assayers, upon whose certificates it is bought and sold.

In the Jordan Valley, six to twelve miles south of Salt Lake City, on the railroads, are the Utah smelters, four or five different concerns, comprising about a dozen stacks. Those in blast, at present, are the Germania, three stacks, three revolving roasters, and one large reverberatory; the Hanauer, 4 stacks and 5 roasters; the Mingo, 4 stacks and 5 reverberatories; the 3 plants are valued at $500,000. Together they keep 7 or 8 stacks pretty steadily in blast, and employ about 350 men, at an average wage of $65 per month.

COAL—Utah contains a great variety of minerals besides those involved in silver mining, to-wit: Silver, gold, lead and copper. Coal occurs on both fronts of the Wasatch, and of the High Plateaus almost the entire length of the Territory. The coal measures underlie an area of many thousand square miles; probably 2,000, that are available. At all events there is enough to meet any possible demand for generations. We should be mining four times as much as we are but that the Union Pacific largely supplies Utah from Wyoming.

The Pleasant Valley Company have mines at Scofield and at Castle Gate, both within 120 miles of Salt Lake City. They have also 80 coke ovens at Castle Gate.

The Union Pacific Company have mines at Scofield, from which they take out about 200,000 tons per annum.

DEEP CREEK.

THE GREAT UTAH BASIN lies between the Wasatch Range on the east and the Sierras Nevada on the west. Passing Oquirrh range about 18 miles West of Salt Lake City, enter Tooele valley, for some distance bordering the southern shores of the Great Salt Lake.

Between Oquirrh range and Deep Creek mountains are a succession of low mountain spurs and broken ranges; Skull valley and Cedar range, Dry

valley, Dugway and Granite ranges, Great American Desert or Mud Flats, Fish Springs mountains, Snake valley, Deep Creek range and Deep Creek valley, near the eastern line of Nevada.

The route is remarkably free from steep grades, being level country nearly all the way. The mountains in the great basin have the appearance of being submerged in clay and sand deposits and cut away by erosion as they rise abruptly from the flat surface of the valleys, they are destitute of vegetation. The Deep Creek mountains however have a plentiful supply of timber—about the last of the rich unexplored mining regions of this vast country are found in the central and western portions of Utah and eastern Nevada and are easily accessible from Salt Lake City.

Why this country, so rich in gold, silver and almost every other mineral should have been so long neglected is a mystery—but now that several rich strikes have been made there the eyes of the people are opened, and hundreds are daily making their way out, to what is destined to be the greatest mining camp the world has yet known.

On leaving Salt Lake, going west.

THE DUGWAY DISTRICT

is the first place of interest. The formation there is porphyry, lime stone and quartzite. There is a zone of burnt lime, black and white, resembling an ash bed, running through the mountains for seven miles. The mineral is found in contact bodies and veins running out from the contacts in frequent succession, cut across the lime rock stratification. Its character is peculiar to itself.

One year ago the Buckhorn mine was located by S. H. Gilson and others. Work was commenced on the claim last March. It only required the removal of the surface debris to find an extensive body of ore that drove the whole country into the wildest state of excitement, and caused hundreds of prospectors to flock out to that district.

FISH SPRINGS

lies about seventeen miles southwest from Dugway. The mines lie on the west side of Fish Springs mountains and yield rich bodies of ore of the hard and soft carbonate character.

DEEP CREEK RANGE,

stretching along nearly the entire western border of Utah—over 100 miles—is the Great Deep Creek range, and there is more undeveloped and unprospected country, known to be rich in mineral wealth, than is anywhere to be found. And when the projected Deep Creek railroad is completed, the Leadville bonanza camp will pale beside it as the stars beside the moon. With the opening of Spring, work was resumed in good earnest and new and startling strikes are being made daily. That there is great wealth hidden in the Deep Creek range is an indisputable fact and there is no camp in America to-day that offers better inducements, to the fortune seeker; all that a man requires is pluck, energy, strength and perseverance and with these qualifications if he cannot succeed there, we are sadly mistaken.

A New System of Concentration.

SINCE the age of stone, minerals have been turned more and more to the use of men, and yet it has become a common claim that mining for the metals is but in its infancy. A product, the value of which is consumed in the expense of handling, is a poor resource indeed; but the raw materials from which profits may be derived are a source of wealth to their possessor. In Gold, Silver,

Copper, Lead, Bismuth, Antimony, Iron, and other metals, untold millions are locked up in their peculiar combinations with themselves and other substances: hence the importance of some cheap method for their extraction and separation.

Of late much thought and money have been expended in the effort to discover a cheap and practical means of extracting the minerals from their ores, at or near the mines, by which the vast quantities of low-grade ores may be utilized.

During the past four years J. D. Coplen and S. Hoag, residents of Denver, Colo., have devoted their time and money to the solution of this problem, with a result obtained which is entirely satisfactory.

It was found that in every attempt heretofore made to concentrate low-grade ores there has been a loss in values ranging from 20 to 60 per cent.

To overcome these obstacles, first a better means for pulverizing or granulating had to be invented, as uniformity in size, as well as uniformity in conditions, must be secured before concentration by gravitation can possibly be successful. These objects are attained: First—By the use of the "Coplen Pulverizer," which will reduce more ore to a given fineness, with less power, than any other machine. It can be adjusted to crush to any desired fineness without suffering the damaging effect of making a part of the mineral too fine. It is easily adjusted to any class of ore. Second—By the "Coplen Slimer," which automatically divides the pulp into six different classes; differing from each other in many respects, each class having a uniformity of conditions favorable to treatment on the concentrator. Third—By The Sizer and Ore Washer, which divides the coarser granular matter into four different sizes, and at the same time thoroughly washes the pulverized ore.

The Coplen system comprises six different machines, five of which are secured by Letters Patent, and the sixth now pending. They are an Automatic Feed, a Pulverizer, a Sizer, a Slimer, a Distributor, and a Concentrator.

SAVING OF VALUES.

With proper pulverization of ores, from 95 to 98 per cent. of their values may be saved.

The main question in concentration is, how close can the ores be worked with greatest profit? The chief principle involved in concentration by the Coplen System is *gravitation*, hence all conditions must be in conformity thereto if success is attained. In estimating the concentratable character of ores, the first to be considered is the hardness and specific gravity of minerals to be saved in contrast with the same conditions of the gangue and other worthless matter.

The cost of treating ores by the Coplen System varies from 50 cents to $2.00 per ton, according to size of plant, price of labor and other conditions.

The San Juan Red Mountain Gold and Silver Mining Company has one of the Coplen mills in successful operation at Ouray, Colorado, where it is subject to public inspection.

For further information regarding the Coplen System, its operations, or terms on machines, or territorial rights,

J. E. DOOLY, Cashier.

UNIVERSITY OF UTAH.

(Formerly University of Deseret.)

UNIVERSITY OF UTAH,

(Formerly University of Deseret.)

SALT LAKE CITY, - - - UTAH.

The University of Utah was founded by the people of Utah, through their representatives in 1850. It offers facilities for higher education to all, and is free from partisan politics and sectarian influence.

THE FOLLOWING COURSES ARE IN OPERATION:

1—A four years' classical course leading to the degree of Bachelor of Arts.

2—A four years' course in General Science leading to the degree of Bachelor of Science.

3—A four years' course in Letters leading to the degree of Bachelor of Letters.

4—A three years' course in Mining and Mining Engineering leading to the degree of Bachelor of Mining Engineering.

5—A four years' Normal course (two years preparatory) leading to the degree of Bachelor of Didactics.

6—A three years' Normal course (two years preparatory).

Graduates of the University, or of other Colleges or Universities of good standing, are provided with facilities for the study of Mathematics, Mineralogy, Geology, Latin, Greek, and Chemistry.

The University has a Department of Military Science and Tactics and a Deaf Mute Department.

The University has a Library of ten thousand volumes; a Museum of rare and valuable specimens; Scientific Laboratories and abundant illustrative apparatus; and a Reading Room supplied with more than seventy of the best newspapers and periodicals.

A Preparatory School designed to prepare students to pursue any of the University courses is open to persons of both sexes over fifteen years of age.

Students are admitted without charges for tuition to any course they are prepared to pursue. There is an annual admission fee of $5.00 for residents of Utah and $25.00 for non-residents. Regularly appointed Normals not charged this fee.

Board and lodging can be procured in the city for from three and a half to five dollars per week By renting rooms and boarding themselves students may reduce these expenses.

Students may receive from the President permits for reduced fare over the railways in Utah. They may also receive half fare permits over the street railroads in Salt Lake City.

For further information apply to the Acting President,

JOSEPH T. KINGSBURY, M. A.

NATURAL GAS.

NATURAL GAS was known upwards of two thousand years ago on the shores of the Caspian sea and in China. The Chinese looked upon this wonderful agent with perfect awe, and the people were forbidden to disturb its springs some two hundred years prior to the Christian era. In 1821 a natural gas spring was discovered in Fredonia, New York, and as early as 1840, in Ohio. It was found in drilling for oil in Oil City, Pennsylvania, shortly afterwards. In Utah Territory, it has been known ever since the early settlement by the indomitable Mormon pioneers. A large spring exists southwest of Farmington that has a record of over thirty years; another at the mouth of the Jordan River, that has been burning at intervals of over twenty-five years, and on the Drake and Keyser property near Centerville, some little drive wells have had a flow for over five years, phenomenal in their output and fully demonstrating the permanency of the supply. About fifty miles north of Salt Lake City, natural gas has been used in burning brick and lime for several years. At Corinne a well on the Guthrie property has a good flow of natural gas, remarkable for its purity and heating power.

Natural gas has disseminated throughout a more extensive area of territory in this country than is commonly supposed. A few years ago Pennsylvania was looked upon as the only field in the United States, but within the last ten years fourteen other States and Territories have come to the front as natural gas producers. This industry is no new or uncertain speculation, but a plain business proposition looking to the solution of the problem of cheap fuel for heating and manufacturing purposes.

So far as the geological formation of Salt Lake Valley is concerned, the same structure exists here as in the eastern gas fields, with the advantage in favor of Salt Lake, that its faulting is of far heavier displacement, covering a more extensive deposit of natural gas, and offering greater inducements to the prospector than any of the rich eastern fields.

SALT LAKE NATURIAL GAS.

With the assurance of natural gas, Salt Lake will become a great manufacturing city in an incredibly short space of time. Gas will be cheaper than water. By that we mean that the fuel bill of a householder will be cheaper than his water bill for the same premises. No event could be of such benefit to Salt Lake and to the entire Territory of Utah, as the certainty of natural gas in sufficient quantities, and we believe that such certainty is now an absolute fact. The cost of living will be reduced fully one-quarter, if not one-third, in fuel bill alone. The electric light works now use $15,000 worth of fuel per year and the street car companies equally as much. An enormous saving will be effected with natural gas and their expense for fuel would be insignificant. One smelter in this city that now pays out $200,000 a year for fuel can, if natural gas can be substituted for coke, save on that item alone fully $175,000 per annum. The Knutsford Hotel can be supplied with fuel for $100 per year.

Natural gas in abundance assured immense manufacturing establishments of every kind will be erected here that will give permanent employment to thousands of persons and add to the prosperity and population of the city. Cheap fuel is what all manufacturers must have and is the most important consideration. The manufactured articles required by the great section of country to the west of here, and by Asia, Australia and the South American countries will be produced here in Salt Lake City. We will manufacture all of the iron that is required on the Pacific Coast.

The New American Natural Gas & Fuel Co. are now the prime movers in the development of these great resources. They own and control some 8000 acres of land, and have already sunk some five wells, ranging in depth from 600 to 850 feet, the smallest two inches and largest six inches, and the results so far have surpassed expectations. The volume of the small well (known as "Tuscarora") equals 5,000,000 feet in 24 hours, and has proved a wonder to visiting capitalists, and pronounced by all as the "Biggest little well on earth."

Wm. C. Hall, Prest.; O. J. Salisbury, Vice-Prest.; Jno. H. Woodman, Sec.; Jno. W. Donnellan, Treas. Wm. H. Rowe, with above officers, form a Board of Directors.

FREE DELIVERY TO ALL PARTS OF THE CITY.

MISCELLANEOUS.

FARMING; STOCK-RAISING.

IRRIGATION.—The area of irrigable-arable land in Utah has been given under a previous head. Although crops are grown in favorable spots without irrigation, yet irrigation is indespensable to the Utah farmer. With the canals and aqueducts made, watering costs at the outside $3.50 an acre. At the same time it enriches the land and assures a full crop. If water can be so distributed as to rnn over and off from the land, it is held that it will impart more of the elements of plant growth than the harvest extracts. A certain forty square miles in Valencia, Spain, under the canal of the Turia, sustain 70,960 souls; and this exclusive of the population of the city of Valencia. At one-fourth of this density, Utah's irrigable-arable lands will sustain 1,250,000 souls. Cultivation is indigenous only in rainless countries, where man controls seed-time and harvest. Any farmer in the world might well chose to do his own watering (if he could), rather than be at the mercy of the capricious skies which bend above the so-called humid regions.

Ten years ago there were 10,000 miles of aqueducts, large and small, watering as many small farms in the valleys of Utah. No doubt the farms and the miles of irrigating channels have both increased in number nearly 100 per cent. since the last census. The necessity for irrigation tends to keep down the size of farms, and this tends to high cultivation. With a strong and fertile soil, an unclouded sky, a clear atmosphere, an equable climate, reliable seasons, plenty of water, and a multitude of husbandmen relatively to the acres cropped, if our product per acre does not double that of the older States we have nobody but ourselves to blame.

WHEAT—Fair Utah wheat ranks in the east with the best No. 2 red, which is the highest grade that appears in most of the Eastern markets. The choicest varieties are a unique product with scarcely an equal in America. Utah wheat has a brighter, larger kernel than that of the East, and, though no handsomer than that of California, it is firmer and its nutriment more concentrated. As high as 60 bushels per acre have been raised here, but the average yield is not more than thirty.

The largest wheat regions are the Cache and Utah Counties, closely followed by San-pete, Salt Lake and Weber Counties. The great staple is, however, raised throughout the entire Territory. Utah wheat rarely falls in price below 1 per pound free on board.

OATS.—Parties who are keeping up work-horses pay 25 to 30 per cent. more for Utah Oats of ordinary quality than for a fair grade of eastern. Utah oats have ranged in price during recent years from 1¼ to 1¾ cents per pound on cars. Large farms have been known to realize an average of eighty-five bushels to the acre by high cultivation.

BARLEY.—Usually Utah barley is of magnificent appearance. In recent years brewing barley has been exported to St. Louis, Milwaukee, California and other points, where it grades up to the best Canadian brewing. It is the use of this barley that gives Utah beer so high a standard. Indeed, the White-club brewing barley will hold its own anywhere as a strictly fancy product.

RYE.—There are a few cars of rye annually offered at figures over one cent per pound. The quality is superb and the yield fair.

CORN —Utah does not rank as a corn country and rarely has any for export. The hot, sultry nights which corn requires are not characteristic of the climate. Still, it must not be supposed that farmers cannot raise corn in Utah, as 500,000 bushels are annually produced.

GRASSES.—In the improvement of Utah land there remains untilled, and scarcely prized, a considerable area of rough ground too dry for grass,

and too broken and stony for grain. This is now being utilized for alfalfa, which succeeds almost anywhere in Utah. All the other tame grasses common to this latitude do well in Utah.

POTATOES.—The Utah potato has a reputation for excellence all over America, and even in Great Britain. For many years great quantities have been exported from the Territory.

The bulk of the potatoes raised and marketed are Early Rose, Early Goodrich, Willard and the Peerless. The king of the Early, Peerless and Compton's Surprise, yield, in favored localities, about 400 bushels to the acre. With high cultivation 800 bushels have been raised to the acre. With proper treatment potato-growing does not impoverish the land, some of the best results coming from ground that has been in potatoes for the last twenty years.

OTHER ROOTS.—Utah has a good reputation for carrots, which sometimes yield, of good quality, as much as 1,000 bushels to the acre; also, for tomatoes, onions, turnips, parsnips, radishes, etc. Beets thrive well, and some day the large tracts of low-lying, but now unwatered lands on the western side of the Salt Lake valley, and elsewhere, will be planted in sugar-beets for the manufacture of sugar.

GREEN STUFFS.—Of green stuffs Utah annually exports considerable quantities of cabbages, cauliflowers, melons, squashes, and celery—the latter growing exceptionally fine.

Hops are also native to Utah, their trailing vines overrunning every other kind of foliage in many of the canyons. One or two parties, notably on the Provo Bench, have heeded this suggestion, and are now growing a superior quality of hops.

The net value of these garden products in 1889 has been carefully estimated at $2,550,000, and in 1890 at considerably more.

ALFALFA.—The greatest farm crop of Utah is alfalfa. On good soil, with plenty of water, it is cut three or four times in the season, the total yield approaching eight tons per acre. The third growth is usually allowed to seed. After threshing, it is still pretty good fodder. It is held that the ground is benefited by its growth. The roots go deep for moisture and sustenance, and there is a perpetual rain of the leaves upon the soil. It is not adapted to other than dry climates. Steady sunny weather is required to cure the heavy growth. It brings the grower $5 to $10 per ton, and he gets 5 or 6 cents per pound for the seed: 400 pounds is a heavy yield per acre, yet not uncommon. Both hay and seed find a market in adjoining Territories.

VALUE OF IMPROVED FARM LANDS.—Improved farm lands in Utah range in value from $5 to $225 an acre, averaging $40 to $50. They are rapidly appreciating in price, however, and it begins to be seen that every acre subject to water, or that can be made subject to water, is intrinsically worth $100. Lands about Grand Junction, Col., entirely similar in character, and not so favorably situated as the lands of Utah and Salt Lake Valleys, five years planted in fine fruit, have been held by their owners against offers of $500 per acre.

CLIMATE; METEOROLOGICAL; SANITARY.

TEMPERATURE AND PRECIPITATION.—The effect of residence in any country upon the physical well-being of man, is mainly a question of climate. In a mountainous district, like Utah, the climate will, of course, vary considerably with varying altitudes and exposures. The inhabited parts of the Territory range, in general, between 4,300 and 6,300 feet in absolute altitude, but 70 per cent. of the population is settled in valleys not more than 4,500 feet higher than the sea, and 60 per cent. of them in the valleys of Great Salt Lake and Utah Lake. In this basin the air is dry, pure, elastic, transparent and bracing; and the temperature compares favorably, in respect of equability, with that of the United States at large, and especially with that of Colorado and Nevada, and the Territories north and south of Utah.

The climate attains that medium between the rigor of the great fresh water lakes region, and eternal summer of Florida and Southern California, which makes it both healthy and agreeable. The normal winter has thirty

to forty days of moderately cold weather, with enough snow for a week or two of sleighing. Indian summer holds on till Thanksgiving, while the planting season begins in February. There is comparative exemption from the changeable weather and raw winds of spring in the north and east. Only one month out of five does the range in temperature exceed 50 degrees. The sun shines perpetually, the air is invigorating, the rapid radiation assures cool nights. But no words or meteorological statistics can convey an adequate idea of the charm of the climate, which continues to grow upon one, no matter how long a resident.

Hardly any form of disease originates in Utah, while upon many diseases contracted elsewhere, simple residence and use of the thermal water in the city, and of Great Salt Lake in the bathing season, are more beneficial than ordinary medical treatment. There is no malaria; asthma is impossible; Beck's Utah Hot Springs are a specific for rheumatism; pyemia from surgical operations is exceedingly rare; pulmonary complaints are stayed in their ravages, if not cured; there are none of the more virulent fevers, and diphtheria takes on a relatively mild type.

People from boasted sanitariums are constantly dropping into Salt Lake City and Valley, experiencing relief, often unexpectedly, settling down and growing robust. Every Utah reader of these lines will readily call to mind examples of this, within his personal knowledge. The Territory is full of octogenarians enjoying a serene and hearty old age, who will be superseded by centenarians when the natives have had time to become such.

Salt Lake City a Perfect High Altitude Resort.—Dr. H. D. Niles, M. D., of Salt Lake City, prepared the following:

"The sanatory advantages of Salt Lake City are—

"1. A distinctly local climate, apparently possessing in a marked degree the popular requirements of a high altitude resort.

"2. Unexcelled salt water bathing, the peculiarities of which may indicate unusual remedial virtues.

"3. Hot, warm and cold sulphur springs, of alleged marvelous curative properties.

"A high altitude resort should possess the greatest possible dryness and equability, an elevation of from 3,500 to 8,000 feet, the greatest number of sunshiny days during the year in which the invalid may enjoy outdoor life, comparative freedom from wind and sand-storms, a proper temperature and certain other qualifications not of a climatological character.

"Dryness.—First in importance is dryness of the air, as indicated inversely by the relative humidity. Salt Lake City's air averages 48.9 per cent. relative humidity, and consequently lacks 51.1 per cent. of saturation. El Paso and Santa Fe are the only places in the United States where observations have been taken at which the air has a greater absorptive capacity than at Salt Lake City.

"Recent investigations have strengthened the prevailing opinion of the absorptive and aseptic qualities peculiar to dry air in the treatment of pulmonary diseases. It is well known that warmth and moisture favor decomposition and the generation of micro-organisms, and lessen the vapor transpiration. Dry air, on the contrary, destroys or retards germ life, in and out of the lungs, and increases the amount exhaled. The moisture thus exhaled may serve as a vehicle for the removal of effete matter, wasted tissue and germs of disease.

"Dr. Dennison, whose original researches have added much to our knowledge of high altitude climates, suggests an ingenious method for calculating the excess of moisture exhaled in a dry, cool air over that in a warm; moist air. In this calculation Glashier's estimate of the weight of vapor in grains in air of a given temperature is adopted, and it is assumed that the dew-point in exhaled air is 94 degrees F., and that it is saturated. Apply this method to the air of Salt Lake City and Los Angeles in the case of a good-sized man, who, we will suppose, breathes twenty times a minute and thirty inches per breath on an average, and we find Salt Lake's excess in transpiration over Los Angeles to be about four ounces daily. The remarkable aseptic and absorptive properties of the air of Salt Lake City unquestionably have a favorable influence in cases of surgery."

Names and Residences of the Members and Officers of the

Legislative Assembly of the Territory of Utah,

WITH THE STANDING COMMITTEES:

THIRTIETH SESSION, 1892.

THE LEGISLATURE.

The Legislature of Utah comprises twelve Councilors and twenty-four Representatives, who are elected for two years, at the general elections held on the first Tuesday after the first Monday in November in odd years, as in 1891 and 1893 and so on. The sessions of the Legislature are biennial, beginning on the second Monday in January of even years, and may continue for a period of sixty days, including Sundays. The members are paid by the Federal Government, $4.00 per day, during the session. The bills, in order to become laws, must pass both houses and receive the approval of the Governor, whose veto is absolute, after which they are subject to amendment by Congress.

Following are the members of the Legislative Assembly for 1891-93, together with the districts they represent:

MEMBERS OF THE COUNCIL:

First District—Joseph Morrell, Logan, Cache County.
Second District—David Evans, Ogden, Weber County.
Third District—John D. Peters, Brigham City, Box Elder County.
Fourth District—R. N. Baskin, Salt Lake City, Salt Lake County: P. J. Moran, Salt Lake City, Salt Lake County: James Glendinning, Salt Lake City, Salt Lake County.
Fifth District—A. J. McCuistion, Tooele, Tooele County.
Sixth District—Wm. H. King, Provo City, Utah County.
Seventh District—Harry Haynes, Murray, Salt Lake County.
Eighth District—Peter Greaves, Ephraim, Sanpete County.
Ninth District—John A. Melville, Fillmore, Millard County.
Tenth District—Robert C. Lund, St. George, Washington County.

OFFICERS OF THE COUNCIL:

President—Wm. H. King, Provo City, Utah County.
Chief Clerk—John W. McNutt, Ogden, Weber County.
Minute Clerk—E. G. Woolley, Jr., Salt Lake City, Salt Lake County.
Enrolling and Engrossing Clerk—George Havercamp, Provo, Utah County.
Sergeant-at-Arms—I. N. Hinkley, Fillmore, Millard County.
Messenger—John Montgomery, Jr., Salt Lake City, Salt Lake County.
Watchman—George R. Chase, Brigham City, Box Elder County.
Chaplain—C. C. Shaw, Hyrum, Cache County.

ALTA—Salt Lake County.

ALTA, the business centre of the Little Cottonwood mining district, is situated near the summit of Little Cottonwood Canyon, at the foot of the famous Emma Hill. At one time Alta was a populous and influential city, but a disastrous fire almost swept it away in the spring of 1878, and it has not been extensively rebuilt. It is 17 miles from Sandy, 28 miles by rail from Salt Lake, and is reached by the Alta Branch of the Rio Grande Western Railway from Sandy.

BEAVER—Beaver County.

BEAVER CITY is situated in the extreme eastern part of the county, in a lovely valley, and is supplied by water from the Beaver River. Its population is less than 2,000. The county court house is a fine substantial brick brick building. It was within a mile of the city, to the east, and in the mouth of the canyon from which the Beaver river flows, where the now abandoned Fort Cameron military reservation was located. Beaver City is possessed of first class water facilities, which may be utilized in the carrying on of manufacturing industries, and, with the enterprise that exists, is destined to become the supply centre for the section of country by which it is surrounded. Here is located the Beaver Co-operative Woolen Factory, turning out a very excellent quality of Woolen fabrics. Also Roller Mill, cost $12,000. Saw mills, planing mills, turning shop and a tannery, all of which are constantly in operation. There are also the following societies: Relief Societies, Young Men's and Young Ladies' Mutual Improvement Associations and Ancient Order of United Workmen. The city was incorporated January 10, 1867. Elections are held biennally. At present the principal occupation of the inhabitants is farming and stock-raising. It has daily mails, arriving from the north and south and south-east.

BEAVER COUNTY OFFICERS.

BENJAMIN—Utah County.

BENJAMIN, situated about midway between Utah Lake and Payson, on the Union Pacific Railway, was first settled by parties from Payson in 1868. Progress was slow until 1870, when settlers came from other parts of the country. Since then it has been in a prosperous condition. There is one church, Latter-day Saints; one district school and one Presbyterian school (brick, costing some $1,300). There are also Young Men's and Young Ladies' Mutual Improvement Associations and a Relief Society.

BINGHAM—Salt Lake County.

BINGHAM is situated about 28 miles southwest of Salt Lake City, in Bingham Canyon, and is the central point of the West Mountain mining district. In past years it enjoyed the reputation of being one of the most solid and reliable mining camps in the country, and through the enterprise of the citizens and their pluck in combatting hard times, it has gained the appellation of the "Old Reliable." The town is surrounded by numerous mines, the majority of which are turning out large quantities of paying ore. There is a good district school, with an average attendance of 41, T H Faris and Carrie Larsen teachers. Bingham is reached by the Bingham branch of the Rio Grande Western Railway, of which it is the terminus. Population 1500.

CEDAR CITY—Iron County.

CEDAR CITY was incorporated in 1852 and has an area of six square miles. Farming and stock-raising are the principal industries of the inhabitants. The town has a tannery and roller mill, a Female Relief Society, Primary and Young Men's and Young Ladies' Mutual Improvement Associations. It has a daily mail. Cedar City has had a peculiar career. The town was moved twice and is still very prosperous. Its proximity to the coal beds and iron mines, in the development of both, assists its growth materially. Population, 967.

MUNICIPAL GOVERNMENT.

Mayor, John Parry; Justices of the Peace, John Chatterley, Sr., Robt. W. Heyborne, Nathaniel W. Pryor; Recorder, Edward J. Palmer; Treasurer, B. Nelson, Jr.; Assessor and Collector, Thomas S. COALVILLE—Summit County.

COALVILLE is the county seat of Summit County. This city was first settled in 1859 by John Spray, Henry B Wild, B E Williams, William H Smith and others. The city was incorporated January 16, 1887, and has an area of twenty square miles. Elections are held bennially. The Echo & Park City Railroad passes through it. It is the supply centre for the large coal mines adjacent; consequently the chief industry of the inhabitants is coal mining. The Co-op Grist Mill Company are now preparing a roller mill and will be in operation shortly. It has a commodious theatre and first-class hotel. It has three schools and three schoolhouses, two district and one New West Educational Association. It has also one library and the following societies: Relief Society, Young Men's and Young Ladies' Mutual Improvement and Primary Associations. It has a daily mail. Population 1,400.

CORINNE—Box Elder County.

This beautiful place has had a most wonderful history, and therewith are numbered some of the most enterprising and well known men in the west. It enjoys more natural advantages than almost any other city in the Territory, having an excellent water power, and very rich and productive soil for farming and grazing purposes. The city at present derives its support mainly from the large cattle and agricultural interests of the surrounding territory. They have here a fine Opera House, a first-class hotel, a livery stable and other business houses usually found in a city of this size. The religious denominations are represented by the Episcopal, Methodist and Presbyterian Churches. The school advantages are good; free schools being a feature that is found in but few cities in the Territory of its size. It is on the Utah & Northern and Southern Pacific Railroads, about 24 miles west of Ogden. Among its earliest settlers, and most prominent among the business men of the place, is J W Guthrie, who has been its efficient mayor for nearly 18 years past. He came to the place in its earliest days, and by strict business integrity and ability has accumulated no small degree of wealth and made for himself a reputation of no mean character, as is evidenced by the fact of his being mayor of the city for so long a time. With all the advantages (both natural and otherwise) possessed by this beautiful little town, the sure advent of more Eastern capital and the building of manufactories, it is destined to be one of the best cities in the Territory. It is headquarters of the Bear Lake & Bear River Water Werks & Irrigation Co.

EPHRAIM—Sanpete County.

EPHRAIM CITY is the third city in the county in point of population and is perhaps the equal of any in importance. It is centrally located on the east side of the valley, being seven miles northeast of Manti. The people are principally Europeans and mainly belong to the Scandinavian race. They are very thrifty and exceedingly well-to-do. While no colossal fortunes are possessed by any of its inhabitants, the people are nearly all in affluent circumstances, and it is a question if there is another city in the Territory where the distribution of wealth is no nearly equal. Its population is about 2,200. It was incorporated February 14, 1868. The principal industry of the citizens is farming. There are four churches, two Latter-day Saints, one Presbyterian and one Methodist; five schools and three schoolhouses. The societies are: Young Men's and Young Ladies' Mutual Improvement Associations. The Young Men's Mutual Improvement Association has also a library. Mail daily.

MUNICIPAL OFFICERS.

Mayor, Parlan McFarlane; Recorder, Peter C Anderson; Treasurer, Alfred Bailey; Assessor and Collector, Andrew Thompson, Jr: Marshal, Alfred Pehrson; Justice of the Peace Ole Olsen; Councilors, Peter Greaves, Peter Schwalbe, P H Hansen, Jr, Henry Green, Niels O. Anderson, J H Otterstrom, Peter Thompson; Street Supervisor, S P Jensen; Sexton, J C Johnson; Poundkeeper, D W Sorenson; J P, Christenson, J P; Quarantine Physician, W H Olsten.

FAIRVIEW, Sanpete County, situated in the northern part of the county, was first settled under the name of North Bend, in the winter of 1859-60. When a postoffice was established the name was changed to Fairview. The city was incorporated February 16, 1872. The principal industry of the citizens is farming. In it is located a large co-operative grist mill, which is in constant operation. There is one church, two schools and two schoolhouses—one district and one Presbyterian—with an average attendance of 164. Sunday School and Young Men's Mutual Improvement Association libraries exist. The societies are: Relief Society, Primary and Young Men's and Young Ladies' Mutual Improvement Associations. Population 1,400.

Penney E W, Hotel.

Romulus and Remus, second fleeces, 67 and 64½ lbs.

I TAKE pleasure in drawing attention to my stock of **FRENCH MERINO RAMS,** which are large, strong, close wooled and vigorous, comparing favorably with the best long wools for mutton, and twice as profitable for our western ranges, for wool. Their hardihood and vitality are truly wonderful, and their herding qualities unsurpassed.

Money expended for these rams will return 1000 per cent. They do not die of a broken heart or hump up around a sage brush, but will be found increasing your herd to the best of their ability. Don't breed an inferior ram if you propose to remain a prosperous wool grower. Don't buy second handed, but come to the fountain head. From these rams you can raise a superior sheep, and sell rams to your neighbors. Money expended for these Rams is only loaned to the flock at 1000 per cent. per annum. The lambs from my stock will double your profits. Scrub sheep men want scrub rams, prosperous wool growers want the best they can procure. My French sheep are the heaviest shearers and the largest mutton Merinos in the world. I have no pampered or inbred stock. All my rams are subjected to the same treatment given ordinary flocks in our Territory. They will shear more the second year than the first. French wethers are worth 50 cents more than any other breed. Remember this: If a *six-pound* sheep pays a profit of 20 cents above running expenses, and is worth $2.00, a *ten-pound* sheep pays a profit of 80 cents, and is worth $8.00 for wool growing purposes.

For the season of 1892 I shall have about 2,500 rams for sale. *Don't* believe anyone who says I am sold out. *I always have rams for sale*; 800 high grades now at the ranch for sale. Come early.

I guarantee all my stock as represented. I can refer to the hundreds of wool growers who have honored me with their patronage. Come and see me before purchasing elsewhere. Come early, and do not wait until December to purchase.

Eighty shepherd pups now on hand.

The latch string is out, and whether you purchase or not, you will be welcome.

CHARLES CRANE,
Kanosh, Millard Co., Utah.

E. W. PENNEY,

KAYSVILLE—Davis County.

KAYSVILLE is situated on the line of the Union Pacific Railway, about 20 miles from Salt Lake City, North. Is very pleasantly situated, being midway from mountain range to the Lake shore. The city is interspersed with fine fruit orchards, and surrounded with well cultivated and productive farming lands. The principal industries of the citizens are farming and the raising of horses, cattle, sheep and bees.

In the town limits are two flouring Mills and an extensive Brick yard. There are two Churches, one Latter Day Saints, and a Presbyterian Chapel in which is conducted a well patronized and flourishing school. Four other schools also afford ample privileges in the educational line. There are also a Music Hall and a Library belonging to the Mutual Improvement Association. A Benevolent and Improvement Society, The Young Mens and the Young Ladies Mutual Improvement Association, Primary and Relief societies etc.

LEHI—Utah County.

LEHI CITY was first settled in 1848; charter granted in 1850. It is situated on the north shore of Utah Lake, and is noted for the purest and finest flow of artesian water in the Territory. Rio Grande Western R R. on the west, Union Pacific on the east and Salt Lake and Western on the north of the city. For enterprise, it rivals any city in the county. The Utah Sugar Factory is located here, costing in the neighborhood of one-half million dollars, furnishing employment to a large body of men, also giving encouragement to beet culture, for which the soil is peculiarly adapted. There is also a first-class creamery, weekly newspaper (Lehi Banner), bank, good hotel accommodations, a fine amusement hall, one of the best south of Salt Lake, the Lehi Academy, under the supervision of the New West Commission, Young Men's and Young Ladies' Mutual Improvement Associations, Libraries and Female Relief Society. L D S and Congregational churches. Population 2,500.

LOGAN CITY,

Cache County.

LOGAN CITY, the capital of Cache county, was located in the spring of 1859. "Its location is the best that could have been chosen in Northern Utah for a large city, with numerous commercial buildings and manufacturing establishments. Ample water power for any number of mills is furnished by Logan River, with its branches, which flow directly through the city. Being situated at the foot of a grand range of mountains, and being the centre of a number of pretty villiages, it presents a beautiful appearance. The Utah & Northern Railroad passes through the valley to the west side of the city," running a branch road from Cache Junction into Logan. It is a most desirable spot, either as a sanitary resort or as a location for the investment of means; or for one desirous of establishing himself permanently in the hope of winning a competence, or even affluence as a result of honest effort. The country is rich in economic resources, virgin in many respects, and presents an unusual field for the enterprising and the industrious. Logan is one of the four Temple cities of the Territory. A fine new Court House, Agricultural College; and the Brigham Young College, New Jersey Academy, and Woodruff Central School, are also located here. There are Episcopal, Presbyterian and Methodist Churches, in addition to those of the Latter-day Saints, Mutual Improvement Association and Libraries and A. O. U. W.; Tabernacle and ward meeting houses; it has two newspapers the Logan *Journal* and *Nation*, Several hotels and eating houses, livery stables and water works. Notably among its industries are three Roller Mills: Central Milling & Elevator Co, (see adv.) Deseret Milling Co (see adv), Thatcher Milling & Elevotor Co, two Brewries (see adv), two foundries (see adv), one broom factory, (see adv), Logan Nursery Co, (see adv), with some 60 acres under cultivation, employing 30 to 50 hands, and not able to supply the demand. Cache Valley Pressed Brick Co & Logan Brick, Pipe & Tile Co., Planing & Lumber Mills etc.

Logan combines all reasonable metropolitan advantages with the most desirable features of a moral section. It is the most prosperous city of northern Utah.

THE TEMPLE.

The corner-stones were laid on the 19th of September, 1877, and completed in 1884. The Temple is 171 feet long, 95 feet wide, and 86 feet high. At the east and west ends are large towers, that on the east being 170 feet high to the top of the vane, the western one being a few feet lower. At each corner is a tower, octagon in shape and with a height of 100 feet. It is understood there are some thing over forty rooms in the building the main or assembly room being 80 feet wide, 104 feet long and some 30 feet from the floor to the ceiling. In addition to the Temple, a one-story building has been erected on the north side, the object for which is to provide offices, reception rooms, a kitchen and a department for the janitor. Rock laying on this extension, which is 80 feet long by 36 feet wide by 23 feet high, began in July of 1877. The structure is of solid rook, and one of the most commendable

features connected with this building is the fact that, as largely as possible, the materials used in the construction have been drawn from the resources of the county. Thus the vast rock deposits of Cache County were developed, while at the same time, a local structure was being built from local material. Some of the stone is almost of the hardness of emery, and is basely susceptible of being dressed. It is surmounted by an iron roof, while the walls outside have been plastered and washed or painted, a tinted color—the tenderest, softest pink, or flesh tint—that gives the whole edifice a warm and cheerful appearance, at the same time producing a most agreeable, yet strange sensation to the eye. A furnace from which flues radiate in all directions, furnishes warmth and adds to convenience and cleanliness. The building lengthwise is east and west, the result being a very imposing appearance viewed at a distance either from the north or the south. The grounds are ample, and are seeded down in lawn grass, implanted with shrubs and flowers and cut through with walls.

COUNTY OFFICERS.

Probate Judge, William Goodwin; Selectman, W D Cranney, of Logan, Wm Haslam of Wellsville, and Thos Griffin of Richmond; Clerk, C D W Fullmer; Assessor & Collector, A G Barber; Treasurer, G W Thatcher, Jr; Prosecuting Attorney, I C Thoresen; Sheriff, Don Kimball; Coroner, Alex Lewis; Superintendent of District Schools, Elijah W Greene; County Surveyor; I C Thoresen; County Recorder, Wm G Farrell; Fish & Game Commissioner, N W Crookston; Inspector of Bees, Alfred J Bell, Logan.

MUNICIPAL.

AGRICULTURAL COLLEGE OF UTAH.

AGRICULTURAL COLLEGE

OF UTAH.

BY the liberality of the Government of the United States and the Territory of Utah, the Agricultural College of Utah has $180,000 to expend during the coming two years for an increase of its faculty and an addition to its plant. Its growth thus far has been unparalleled in the history of such institutions. It has five full courses of instruction, viz.: Agriculture, Mechanic Arts, Domestic Arts, Civil Engineering and a Commercial course. It also has several short courses of instruction. Its large corps of Professors are all specialists. The distinguishing feature of the College is that, in addition to a thorough general education, it gives practical exercises every day in every department—on the farm, in the shops, in the cooking, laundry, sewing, dairy and other working departments. In addition it has extensive apparatus for illustration. Military science is taught by an officer detailed from the National army.

Board costs $2.50 to $3.00 per week. Tuition is free; admittance fee $5.00. For catalogue address,

MANTI—San Pete County.

MANTI, the County Seat of Sanpete County, was incorporated Feb. 6, 1851. Is well represented as to churches and schools. The citizens are principally engaged in farming. Manti is located very nearly the centre of the County, is most important in point of population and wealth. The city is thriving and growing rapidly. Population 2,000.

The Manti Temple is the second grand structure in Utah and can be seen from all parts of the San Pete Valley. Ground was broken on the last day of April, 1877. Rocklaying began on the 14th day of April, 1579. The building is 171 feet 6 inches long and 95 feet wide. The distance from the ground to the top of the parapet is 92 feet 6 inches. On the east and the west ends there are towers, the distance to the top of that on the east being 179 feet and to the top of that on the west side 169 feet. Both these towers are 30 feet square at the base. The walls are 3 feet 6 inches at the bottom and 3 feet at the top. Adjoining and connected with the temple is a structure 100 feet long, 40 feet wide and two stories high, in which the apparatus designed to heat the whole building is placed. The side building is occupied by the janitor and assistants, and is also a reception room. The buildings are heated by steam, while water is conveyed through pipes. A spring, the water from which is carried a considerable distance through pipes, will supply the temple with what water is needed. The side hill leading up to the temple is laid off into four terraces each 17 feet high. These terraces are walled a distance of about 1,000 feet each, on the eastern and southern descents. At every terrace is a landing 16 feet in width, while from the first to the top one there are 163 steps. The walls surrounding the terraces are of considerable width and will be used as walks.

MURRAY—Salt Lake County.

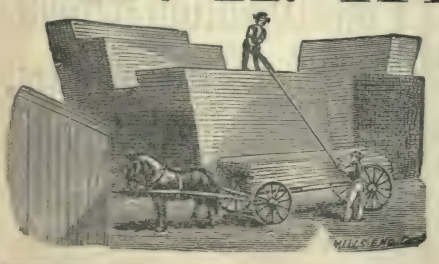

MURRAY (also known as Francklyn), is situated on the line of the U P Railway, seven miles south of Salt Lake. At this point are located the Germania, Hanauer and Horn Silver smelters. It is the natural supply point for Mill Creek, Cottonwood and the surrounding farming country. They have a good district school and Methodist church. The brick manufactured here are a superior article, and being on the line of the railroad enables them to compete, and in some cases undersell, Salt Lake and Ogden manufacturers. Population 1,000.

County, Town and School Bonds and Warrants purchased by E. H. Rollins & Sons, Bankers, New York, Denver and Salt Lake City. Address E. H. Rollins & Sons, Salt Lake City.

MANUFACTURER OF ALL KINDS OF PURE SPICES.

NEPHI—Juab County.

NEPHI, the county seat, is located at the eastern part of the county. The town is at the Junction of the Union Pacific and Sanpete Valley Ry's. Nephi is making rapid strides in the way of solid building and improvements. At this point nearly all the wool from the south is gathered and shipped; it is here the Southern Wool Growers' Association hold their conventions. Her Hotels are well appointed; churches and schools are well represented. Y M & Y L M I Associations, Relief Society etc. Among its manufacturing industries are the Nephi Plaster & Manufacturing Co, manufacturing a superior Article of Plaster of Paris. Nephi Salt Mining & Manufacturing Co, and the Nephi Mill and Manufacturing Co, turning out the most excellent quality of flour, equalling if not surpassing any in the Territory. The inhabitants are chiefly engaged in farming and stock-raising. Its population is about 2,200.

OGDEN CITY.

Weber County.

"There is probably no city of its class in the United States of equal population and commercial importance better known to the world at large than the city of Ogden.

The early settlement of the present site of Ogden was contemporaneous with that of Salt Lake City. The early argonauts who broke the virgin soil of Utah laid a most substantial foundation upon which has been erected a superstructure of most perfect proportions, and giving full promise of becoming one of the grandest and most prosperous of cities within the limits of a territory that within the near future will be invested with the rights and privileges of statehood.

The peuliar location of Ogden geographically has contributed materially to its growth, and the city is a general distributing point of the Territory, and is the most desirable point from which to establish direct communications with other portions of the country. The city is delightfully located in a lovely valley bounded on one side by the Wasatch mountains and on the other by the Weber river, and the space thus occupied is crowded with elegant private residences, massive public buildings and gardens, resorts and places of amusement rarely equalled and never excelled by her sister cities of the crowded east.

The city has been laid out with especial attention to its drainage and sanitary facilities, and all modern equipments, such as electric railways, water works, gas works, electric light plants, etc, are provided. The public buildings are models of architectural excellence, while the private residences are designed with a view to furnish the comforts of home and to exemplify the most recent developments of artistic elegance. The country surrounding the city is dotted with beautifully arranged and highly cultivated country seats, and fruit in almost endless quantity and variety grows in any part of the valley A few miles from the city the Ogden and Weber canyons divide the mountains through which flow the Ogden and Weber rivers carrying in their cool depths health and its kindred blessings into the heart of the city.

There is still a fine opportunity for the utilizing of these water powers for manufactories cheaply and at a vast profit to all industries for which this power may be used.

The farms lying on the outskirts of Ogden are finely improved and the soil is of unexcelled fertility, and the thrifty class of citizens who occupy them grow bounteous harvests. An average idea of the fertility of the soil of this country can be formed from the productions of a single acre: either six tons of hay or three crops of alfalfa hay, sixty bushels of No 1 wheat, sixty-five

bushels of oats, 600 bushels of potatoes, 500 bushels of tomatoes or 1,000 bushels of apples. There are at present about 30,000 acres of land in Weber county under cultivation, about one-half of which is devoted to pasturage.

Ogden canyon furnishes a relief to residents of the city during the long heated summer months and here may be seen hundreds of white topped tourists tents dotting the mossy banks of the brooks from which the ennuied campers out may all through the summer months entice the palatable speckled trout.

Several of the best equipped bathing resorts to be found in the United States are located at easy access from any part of the city. The delicious climate both for comfort and from a point of health is noted all over the world. Pulmonary diseases are unknown and those suffering from these complaints are almost instantly relieved and in a majority of cases permanently cured for life in or near this lovely, healthful city. Humidity in the atmosphere is never preceptible, the weather is equable, extremes being scarcely known ; the winter genial and the summers exempt from the excessive and dangerous heat characteristic of this season further east and further west.

As a business centre Ogden leaves nothing to be desired. An abundance of raw material, a fine system of railroads, reliable and skilled labor, good wages, and other incidents essential to economic production make the city desirable for the location of manufacturing plants.

Public improvements are constantly being made. Taxes are nominal and the government of the city well administered.

All taken together there is but little left to be desired from every economic, sanitary, business, religious or educational standpoint in the city of Ogden, and it is safe to state that there is no city in the world where mankind is offered more inducements in every point of view for passing happy, prosperous, and satisfactory lives than is afforded by life in the beautiful city of Ogden.

The railroads centering at Ogden are the Union Pacific, Rio Grande Western, Utah & Northern, Southern Pacific, Echo & Park City.

CHURCHES OF OGDEN.

In the city of Ogden almost every sect and creed have a representation, including Episcopolians, Methodist, Congregationalist, Roman Catholic, Presbyterian, Baptist, German Lutheran, Christian, L D S, etc., and all of them report steady additions to their respective rosters of membership.

The houses of worship are commodious and the improvements completed within a short period are notable, and embrace the Presbyterian church erected at a cost of $35,000; the Baptist church costing $10,000 ; the Methodist Episcopal church, costing $50,000 ; Episcopal church, $10,000 ; Congregational church $7,000 ; while the Roman Catholic church will when completed represent an outlay of something over $75,000.

A statistical paper recently published shows that there are seven religious denominations in Ogden, owning property valued at about $465,000, and possessing a total membership of 1,900. The L D S church owns property assessed at $36,000."

FRATERNAL DIRECTORY.

MASONIC.

Weber Lodge No 6, A F & A M—F C Schramm, W M; W T Beardsley, Sec'y. Regular communications first and third Thursday in each month.

Ogden chapter No 2, R A M—Geo F Brown, M E H P; C J Currier, Sec'y. Regular convocation second Tuesday in each month.

JOHN WATSON, Manager.

ANOTHER

GREAT ACHIEVEMENT IN VEHICLES

—IS THE—

Ludlow Spring Wagons & Buggies

Manufactured under the Specifications of

SIDNEY STEVENS.

They are built with either Plain or Two or Three Panel Beds, all sizes, and of the finest workmanship. Peculiarly adapted to the Territory of UTAH, IDAHO, NEVADA and WYOMING.

THE ADOPTION of these Springs by the Government and the great Express Companies of the east proves their superior merit. The great objection to carrying the load on the weakest part of the axle is now overcome.

No more springing of axles, no more broken axles, no more jerking or clacking, no more grinding out of the boxing in the hub with the bending down of the axle under a load, no more rattling of clips and bolts under your vehicle, but a smooth, easy, pleasant ride. No difference with or without load, as the springs have an oscillating movement, carries the load to the wheel as the load increases, and not diminish the agreeable, easy motion of the springs.

The double bearing under the bed is so scientifically arranged that it does away with the attachments of the old style vehicles, supposed to be necessary to support the load. Thus strength, durability and neatness are scientifically combined, and ease of motion accomplished; and when fitted up with Extension Top is equal to an expensive carriage at one-third the price.

"The Celebrated Old Hickory Wagon."

STRENGTH,

DURABILITY,

HONEST CONSTRUCTION.

Our Contract calls for a Better and Stronger Wagon than any ever Constructed for any Firm in the Country.

HAVE WE SUCCEEDED?

Try one and allow the decision to rest on an absolute comparison.

SIDNEY STEVENS,

SOLE AGENT.

DRUGGISTS.

2453 Washington Avenue, Ogden, Utah.

WE are Manufacturers' Agents for all the leading lines of goods that we carry. Having made arrangements with all the leading houses to represent them in Ogden and the surrounding country, we can offer better inducements than have been offered before on the same class of goods. In many lines of staple and patent medicines we buy in sufficient quantities to have them delivered to us, thereby saving the great expense of freight. This enables us to sell at the same prices as many of the Eastern houses.

We carry at all times a large and well assorted stock of

MEDICINES, FANCY GOODS,
DRUGS, TOILET ARTICLES,
DRUGGISTS' SUNDRIES, ETC.
PAINTS, OILS, VARNISHES,
BRUSHES, WINES AND LIQUORS
FOR MEDICINAL PURPOSES.

SACRED HEART ACADEMY,

OGDEN, UTAH.

FOUNDED IN 1888.

Conducted by the Sisters of the Holy Cross.

This institution, devoted to the education of young ladies and little girls, is situated on one of the most elevated sites in the centre of the city, commanding an extensive view of the surrounding country. The high and airy location greatly enhances the advantages for health and comfort.

The Sisters of the Holy Cross, as members of an order which makes the education of woman its principal life work, enjoy a wide experience, which gives them unusual success in training both the mind and heart of the young girl, and their aim being to prepare her to become not only a useful and ornamental member of society, but a moral force as well.

The curriculum is arranged with the view of giving a well rounded education, which shall fit the graduates of this institution for any sphere which a woman can be expected to fill. It includes everything necessary to this end, from domestic economy, stenography, typewriting, bookkeeping, English in all its branches, lowest as well as highest, up through the languages, sciences and arts.

PARK CITY,

Summit County.

(See also Mines of Utah.)

PARK CITY, Summit county, is an incorporated city. It is located in the Uintah district, at the head of the Cottonwoods, lying eastward of the dividing ridge between this county, Wasatch and Utah counties, and contains nearly all of the principal mines of the district. It was established about twenty-nine years ago as a mining camp, since which time it has grown very steadily, and at present can lay claim to being the wealthiest and most prosperous mining city in the Territory. It is connected with Ogden and Salt Lake City by rail. It is wildely known because of the vastness and inexhaustible supply of mineral resources found within its boundaries. They (the mines) are more thoroughly developed and yield more largely than any others in the Territory. Population, 7,000.

MUNICIPAL:

Mayor, Gilbert G. Gregor; F. W. Hayg, City Rec.; F. J. McLaughlin, Assessor; J. H. Deming, Treasurer; Frederic W. Hayg, Police Justice: W. I. Snyder, City Attorney; Aldermen, Thos. Cupit, Robt. T. Kimball, First Ward; Oliver C. Lockhart, Second Ward; Edwin Kimball, Third Ward.

County, Town and School Bonds and Warrants purchased by E. H. Rollins & Sons, Bankers, New York, Denver and Salt Lake City. Address E. H. Rollins & Sons, Salt Lake City.

PROVO CITY,

Utah County.

Provo is the capital of Utah County. The county is second in population in Utah. The city is surrounded by one of the richest agricultural sections in the whole Territory, there being settlements continously north and south of it, and arround the western base of the Wasatch Mountains for a distance of some forty miles. The people are prosperous, and unitedly strive to promote, as well as participate in a growth which is now quite rapid, not only in the city, but also in the entire county. Being the first born of the county, and its capital, Provo has naturally built up more solidly than its neighbors. The population of the city is between 5,700 and 6,000.

Provo has a complete and most excellent school system, and with two academies, and public schools, will compare most favorably with the east. Churches are not lacking, and the utmost freedom of worship, thought and action prevail. The Brigham Young Academy has been erected at a cost of not less than $75,000. The new Northwest Educational Association has also erected a fine building here, known as the Procter Academy, at a cost of $8,000. There are a number of other school houses, new and commodious.

Notably among the manufacturing industries are the Provo Woollen Mills, running to its full capacity, two large Roller Mills, Planing Mills, two foundries, brick yards, lime kilns, etc.

The Territorial Insane Asylum is located at Provo. It is supplied with all the modern and most approved appliances, is surrounded by a beautiful tract of land for farming, is built right under the overhanging Wasatch peaks, and commands a glorious view of the whole valley and of the lake on the west. When completed it will cost not less than half a million dollars.

The County Court House and City Hall, a joint building, cost $30,000, and occupies a valuable site. The new County Jail, built after the most modern architecture, with steel cells and a pleasant and attractive exterior, cost $15,000 to $18,000.

Perhaps no other city of double its population in the United States has so fine a building of amusement as Provo. The Provo Opera House has a seating capacity of 900, and cost over $30,000.

There are several hotels in the city which, while not of a pretentious nature, nevertheless afford ample accommodations, and all supply a most excellent table.

One of the finest buildings in the Territory is the Tabernacle at Provo. It has already cost close on to $75,000, and when all work is done on it will not run under $100,000. Besides this there are a number of lesser church buildings, as well as Presbyterian, Methodist and other edifices for the worship of God, which give the city a metropolitan air, and offer a variety of forms of worship for those who are not particular where the Sabbath is observed.

That Provo is destined to be a great city, none who know her opportunities or appreciate the extent of her resources can doubt. The day of her more rapid growth may be delayed beyond what is now anticipated. We do not think so. But it will come as sure as the sun is to rise. If the united effort of all her citizens avail aught; if there be any teaching in the experience of the past; if a heaven-blessed country, of boundless mineral resources and almost limitless agricultural productions, if healthful influences and equability of climate; if the greatest of natural attractions give promise to due appreciation, then is Provo destined to become a city of importance, and those who come earliest will be made most welcome and will participate in the fortunes and favors that await the honest, thrifty and industrious, the health seeker and the lover of virtuous pleasures.

UTAH COUNTY OFFICERS.

SAINT GEORGE—Washington County.

ST. GEORGE the county seat of Washington County, is located near the junction of the Rio Virgen and Santa Clara rivers, and about six miles north of the Arizona line. It is the principal city of Southern Utah, and is noted for fine gardens and rare fruits, although in many instances the earth had to be hauled miles to make the gardens on the alkaline sands. The principal occupation of the citizens is farming and gardening. Grapes are cultivated quite extensively, and a considerable amount of wine is made.

The Dixie Mining and Smelting Co (Inc) with a capital stock of $125.000 Prest, Jno Pymm; Sec & Treas, Seth A Pymm; Directors, V Jarvis, H Pickett Thos Judd, Jas Andrus; R C Lund, Genl Mngr. Works are located one and one-third miles northwest of Post Office, Mills 18 miles southwest of St George commenced operation Oct 30, 1891. They employ some 50 teams and prospects of future greatness are very flattering. There are five churches, Latter-day Saints, one Presbyterian, six schools, and one Academy, five District and one Presbyterian. The Sunday school has a library, while there are also a Lyceum and a Reading Room, which the Y M M I Association maintain for public use. The societies are: Relief Society and Y M and Y L M I Association. The stake church is also located here, a beautiful structure built of native sandstone, taken from a magnificent quarry in the vicinity and cut and dressed in uniform size. St George is certainly one of the most enterprising places in Southern Utah and its population deserves great prosperity. It has a daily mail. Population 1,500.

ST. GEORGE TEMPLE

presents a magnificent sight to the eye, and the effect on the mind can be understood only by those who have come suddenly upon the grand and solemn structure. Coming from the north, within half a mile of St George, the county road makes a sudden turn around a knoll on the general descent, when a full view of the temple, standing on the level plain—grand, solemn, silent and white as the driven snow in contrast to the red mountains by which it is surrounded—bursts upon the delighted vision. The St George Temple was completed a number of years ago, it is near the centre of the valley in which it is situated, and is some 335 miles south of Salt Lake City. The temple was finished and received its preliminary dedication January 1st, 1877, being open for ceremonial purposes on the 9th day of January of the same year. It stands on the plain, a thing of magnificence and beauty, and inspires awe, no less on account of its magnitude than because of the difficulties mastered, and obstacles surmounted, and the sacrifices endured by the people in its building, and which nrcessarily grew out of the adverse conditions and the poverty of the people by whom it was erected.

COUNTY OFFICERS.

Francis L Daggett, Probate Judge; Jas G Duffin, Selectman: Seth A Pymm, County Clerk; A W Ivins, Assessor & Collector; D H Morris, Prosecuting Atty; Horatio Pickett, Coroner; Seth A Pymm, Recorder; George Brooks, Sheriff; Isaac C McFarlane, Surveyor; Horatio Pickett, Treasurer; Levi N Hameon, Supt of District Schools; Robt C Lund, Selectman; John A Gardner, Selectman.

MUNICIPAL.

Mayor, Anthony W Ivins; Treasurer, John M Macfarlane Jr; Recorder, Edwin H Snow; Marshal, Geo Brooks; Assessor & Collector, David H Morris; Justices of the Peace, Geo F Whitehead, Ashby Snow; Councilors, Horatio Pickett, Robt C Lund, Richard Bentley, M M Snow, Francis L Daggett, Thomas P Coltam.

SANDY—Salt Lake County.

SANDY is situated twelve miles south of Salt Lake City, on the line of the Union Pacific and Rio Grand Railways, at their junction with the Alta and Bingham branches. Although a small town, it is one of considerable importance. A large portion of the ores from the Cottonwoods and Bingham Canyon are shipped there for sampling. After being tested, much of the ore remains in Sandy until sold, and the business of handling, transferring and shipping ores is the principal enterprise of the inhabitants. A number of smelters are located in the vicinity, and in times of mining activity are in general operation, giving employment to a large number of men. Daily mail from the north and south. Population 1,100.

SILVER REEF—Washington County.

SILVER REEF is a mining camp in every respect. It is situated one mile from Leeds and about five miles west of Toquerville. For a long time, and during the great prosperity of the mines at Silver Reef, it had quite a large population, more or less of a floating character. It is the idea of geologists and mining experts that the Reef is barely touched instead of being worked out. Population, 165.

SPANISH FORK—Utah County.

SPANISH FORK is situated sixty miles south of Salt Lake City, on the line of the Union Pacific and Rio Grande Western Railroads. It is one of the most prosperous cities in Utah, surrounded by good farming land. Although Spanish Fork has never enjoyed a boom, she has had a steady and healthy growth, and prides herself on having some of the finest business blocks south of Salt Lake. Present Population 3,476. She bids fair to become the largest city in Utah County.

There are three churches—Latter-day Saints, Presbyterian and Methodist. Good district schools, Presbyterian and Methodist schools, Female Relief Society, Y M and Y L M I Associations, and Young People's Christian Endeavor Association. One of the finest Roller Mills in the Territory, turning out a fine quality of flour. Two papers, "INDEX" and "SUN," six daily mails, and bank with a capital of $25,000.

SPRINGVILLE—Utah County.

SPRINGVILLE was settled in 1850 and incorporated in 1852. Elections are held biennially. There are two churches, with commodious church buildings, Latter-day Saints and Presbyterian, nine schools and seven school houses, including Hungerford Academy and the new central school-house, which will accommodate 500 pupils; two libraries, Y M M I A and a circulating library. They have the following societies, viz: Y M & Y L I Associations, Relief Society and A O U W. There is one Woolen Mill, a grist mill, and a roller mill in course of construction, one sampler running and a forty stamp mill in contemplation. One newspaper, the *Springville Independent* looks after the local interests, with its circulation of 600. One bank (The Springville Banking Co), Seven Mercantile houses, two Furniture Stores, two Drug Stores, one Jeweler, two Meat Markets, two Millinery establishments, one Planing Mill, and two Lumber Yards, three Brick yards, two Barber shops, four Blacksmith shops, two Livery stables, one Wagon and Carriage shop, four Hotels, three Restaurants, two Harness shops, and one creamery. The new buildings are: The Bank, H T Reynolds and Co's Store, the Kirwin & Bonny block, Miner and Sons building, Nettie Kerr's Millinery store, J P Evans' tin shop, W M Roylance & Co's Produce house, Jas McAuley's store, with fifty other buildings, dwellings, etc, commenced since the new year. There are three railroads, the R G W, the Tintic Range, and the U P R R, Waterworks and electric light are in contemplation. The city is delightfully situated, well watered, soil adapted specially to fruit, grain and vegetables; is six miles from Provo, the county seat; the citizens are chiefly employed in agriculture and stock raising. Mail is received from the north and south four times per day. The town is and has been running under prohibitory regulations for several years, which suits nine-tenths of the population, consisting of 3,000 people.

VERNAL—Uintah County.

The first settlement of Uintah County was in Ashley, in 1873. The first house was erected in that year by Dodds and Evans, who were engaged in the cattle business. The house was not occupied until two years afterward. The principal settlement is, however, Vernal. In the fall of 1879 J M Barker and Robt Snyder located a ranch on the creek just below Dodd. At this time there were but seven men and one woman, Mrs Snyder being the first white woman on Ashley soil. In 1877 two more families migrated thither and in 1878 a few more, and in 1879 Ashley experienced a boom. The winter of 1879 was severe, much stock was lost and the settlers were subjected to privations. From that period progress has been made until the valley has been transformed by well-cultivated farms dotted with substantial and ornamental dwellings. The population is estimated at 4,000. The soil and climate are excellent, coal and asphaltum are in abundance, while jet, Ozokerite and Slatterite are found in paying quantities; precious metals are fairly represented, and for stock-raising Uintah county is noted. Transportation is by wagon, the nearest railroad station being over 100. Population, 400.
